DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-23 drawn to products of the formula I, classified in classes 544 and 548 in various subclasses.
- II. Claims 24-31 drawn to methods of treating diseases with the compound of formula I classified in class 514 in various subclasses.
- III. Claims 32-36 drawn to processes for preparing compounds of the formula I classified in classes 544 and 548 in various subclasses.

The above groups are identified as general areas. Accordingly, as groups, they are independent or distinct as:

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different products or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different products (see for example the compounds on page 23 lines 19 and 31).

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with

another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(b)). In the instant case the process for using the product as claimed can be practiced with other materially different compounds such as the PK inhibitors listed on page 4 of the instant specification.

Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups, restriction for examination purposes as indicated is proper.

The above groups themselves are inclusive of patentable distinct subject matter. Accordingly, along with the election of one of the above groups, the following action is also taken:

Claims 1, 24, and 32 are generic to a plurality of disclosed patentably distinct species comprising, for example, the compounds of (1) line 21 page 23, (2) line 31 page 23, etc., (3) the method of treating psoriasis with the compound found on line 23 page 23, etc., and (4) the process of preparing the compound found on line 29 page 23, etc. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Upon the election of a single disclosed species (e.g. Example, page number and structural depiction), a generic concept, inclusive of the elected species, will be identified by the Examiner for examination. Moreover, whatever specific compound is ultimately elected, applicants are required to list all claims readable thereon.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined and an election of a single disclosed species even though the requirement be traversed (37 CFR 1.143).

An attempt was made to present this requirement telephonically but did not result in an election being made.

Conclusion

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Rebecca L. Anderson whose telephone number is (703) 605-1157. Mrs. Anderson can normally be reached Monday through Friday 7:00AM to 3:30PM.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Mr. Joseph McKane, can be reached at (703) 308-4537.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone numbers are (703) 308-1235 and (703) 308-0196.

A facsimile center has been established. The hours of operation are Monday through Friday 8:45AM to 4:45PM. The telecopier numbers for accessing the facsimile machine are (703) 308-4242, (703) 305-3592, and (703) 305-3014.
